Proven Differentiation

# "My Students" Tab – "Manage Students" Overview

My Roster

- Navigate to any section of the Students' Total Talent Portfolio
- Change Registration Information
- Print Profiles in a variety of languages

Live Student Activity Ticker

Shows what your students are doing right now.

Manage Students

Manage Students
- Register a Student
- Update Student Roster
- Bypass Profiler
- Reset Student Profiles

Register a Student:

Students can be mass registered by sending the Student Users upload file to Renzulli Learning. You can also manually register students on the Teacher site. Alternatively, you can use the Student Access Code function to have students self-register.

1. To manually register a student, select Register a Student
2. Select the School, then enter the student registration information
   - Suggestion: Use email address as Username or a unique pattern such as first initial + last name + school or district acronym (jsmith.vps)
   - Click "Select Additional Teachers" if the student should be assigned to additional teachers
3. Click "Finish" to complete and print or "Next" to complete and add another student

Update Student Roster:

1. Click "Update Student Roster"
2. Click the drop down for "All Students" – you have the option to filter by grade/school
3. Check applicable students and click "Submit" at the bottom of the page

Bypass Profiler:

You can choose to bypass the Profiler for PK-1 students, which puts them right into the system with all age-appropriate resources.

Reset Student Profiles:

Perhaps at the start of a new year the new teacher wants to start students over with a fresh start, or you can invite students to walk through their profile "as is" and reconsider the questions.
